

RockStar® Kits – The easy choice

RockStar® Kits are standardised construction sets, which allow you to configure a complete heavy duty connector. They consist of a male insert, female insert, hood, bulkhead housing and cable gland.

Your advantages:

- Easy selection – all the components on one catalogue page
- Easy ordering – a single order number for all the components as a set
- Easy storage – a complete set into a single package
- Easy handling – you only have to carry one single package with you instead of many individual components
- Easy assembly – all you need is a screwdriver
- Wide variety – no matter what components you may need as a set, we are able to configure an individual kit on your request

RockStar® single components and kits with screw connection

Either select the individual components or choose the complete connector kit by entering a single order number.

RockStar® single components and kits with Push In connection

The Push In technology reduces assembly times to a minimum. Flexible conductors with crimped wire end ferrules or solid conductors will be directly inserted into the clamping point without the use of tools – done! Wiring with Push In is easy and 100% safe.

Either select the individual components or choose the complete connector kit by entering a single order number.
